SIMPLY MASTERING RAINWATER

## GREAT STYLE & RELIABILITY

The Zambelli ZM robust master system makes buildings look great and keeps its looks for longer while also effectively keeping your building dry. The ZM robust colour coating consists of a durable zinc-magnesium finish for additional and persistent protection against corrosion. Show your colours! The ZM robust master system now offers you even greater possibilities with the choice of bespoke colours available in options you've only dreamed of having access to before.

### THE "ROBUST RANGE" FOR PROFESSIONALS

- ▶ All components have a zinc-magnesium finish for persistent protection against corrosion
- ▶ Maximum stability - as its made from steel, high winds and snow loads are easily borne
- ▶ A consistent surface – guaranteed within the master system
- ▶ Textured and especially tough colour coating makes the rainwater drainage system supremely resistant to scratches or colour changes/fading.
- ▶ Zambelli's system warranty guarantees quality at an affordable price: 100% consistently accurate manufacture & fit, simple installation, a broad range/choice.

Our complete system meets the highest expectations

The new "robust range" is available in:

The robust colour coating

Enhancements offered by the robust colour coating:

- ▶ scratching resistance  $\geq 30N$
- ▶ UV resistance RUV 4 according to EN10169-2

- Robust top coat (ca. 20my) based on polyester for highest scratching resistance
- Primer (ca 5my) for a perfect bond and extra protection against corrosion
- Zinc-Magnesium finish (min. 120g/m<sup>2</sup>) for additional, persistent protection against corrosion
- Steel - especially optimized for use in water drainage purposes
